Summary

I am an experienced programmer who has been working since 2021. Throughout my career, I have developed expertise as a Backend Developer and Full Stack Web Developer. I have extensive experience using Laravel to build efficient and scalable web applications. I am also proficient in PHP, JavaScript, and various other web technologies, enabling me to create innovative and high-quality solutions.

Additionally, I have worked as IT support, assisting clients in resolving issues, conducting database analysis, and collaborating with programmers to solve emerging problems.

Career History

Programmer at PT KREDDO INDONESIA
Aug 2023 - Present

I work as a Full Stack Web Developer. My primary responsibilities include developing a Customer Relationship Management (CRM) system with integration to Meta WhatsApp. I utilize my skills in both front-end and back-end development to create robust and scalable web applications, ensuring seamless communication and functionality within the CRM system.

Programmer at PT APPKEY
Aug 2020 - Aug 2023

I work as a Backend Developer, where my primary responsibilities include creating APIs for mobile applications and developing full-stack web applications. I frequently use Laravel to build efficient and scalable solutions, ensuring seamless integration and functionality across various platforms.

IT Support di Trobex Systems (PT Solusindo Daya Prima)
Nov 2019 - Jun 2020

At Trobex System, a company specializing in hotel management systems, I worked as an IT Support Specialist. My responsibilities included assisting clients in resolving technical issues related to our hotel management system, conducting thorough database analysis to identify and troubleshoot problems, and collaborating closely with programmers to address and solve emerging issues. I provided timely and effective support to ensure client satisfaction and system efficiency.
